Summary

Experienced product manager making a career transition to full-stack web development. Eager to contribute his passion for creative logic to innovating elegant websites and apps. Most inspired when serving a broad audience and when challenged with complex problems.

Experience

Gameplan Jobs // Jul 2015 - Present
Co-founder, Director of Product

- Remotely manage development of high-volume assessment and job placement app for companies in the US and UK
- Prioritize project backlog as product owner, work closely with three different groups of developers and scrum masters to set realistic sprint goals, write 17 user stories and establish QA protocol for testing
- Create UI prototype for a new user type using Bootstrap and jQuery
- Establish scope of information required for machine learning with data scientists, implement into future product design
- Integrate two APIs with assessment partners

TCG (Robert-Half) // Apr 2012 - Jun 2015
Developmental Editor, Freelance Associate

- Provided developmental and copy-editing for 340 presentations on tight deadlines for tech companies
- Designed 12 product overviews and branding for a DW/BI startup

Mosaica Education // Jan 2011 - Dec 2013
Curriculum Developer

- Created four distance-learning STEM units with Minecraft
- Implemented feedback from teachers for over 200 online course units

Education

CareerFoundry // Aug 2016 - Feb 2017
Web Development

- Completed a six-month course to refine full-stack skills, expanded understanding of OOP, REST, framework interaction, TDD, and security
- Developed three sites and one production-ready web app with automatic tests, live updates, versatile caching, and secure payment features
- Voluntarily assisted new students with debugging, route configuration, use of Command Line, database migration, deployment to Heroku, and design

Oglethorpe University // Jan 2007 - Dec 2010
B.A. Philosophy

- Built a solid foundation in formal logic and the ability to identify and resolve conflicts within abstract systems
